

INTERNSHIP

Weekly Report

Week No: 3

Date: 10-11-2025

Class: AIML-A

Batch No: A-16

Title of the Project: End-to-End Portfolio Management and Tax Tracking System

S.No.	Regd.No.	Name of the Student	Remarks / Suggestions (To be filled by Guide)
1	23071A6601	Vaibhavi Akuthota	
2	23071A6625	G.V.S.B.Tejas	
3	23071A6632	K.Harinath Reddy	
4	23071A6653	S.Vamshidhar Reddy	
5	23071A6659	Talupula Durga Sai Pranav	

Work progress :

- Started with a blank slate to explore various algorithmic approaches for stock market prediction, investigating standard Time Series models like ARIMA and basic LSTMs.
- Identified the limitations of traditional models, specifically their inability to capture the relationships between different stocks (treating them as isolated entities).
- Discovered the concept of "Geometric Deep Learning" and "Graph Signal Processing," which treats the stock market as an interconnected network rather than a list of numbers.
- Explored the specific idea of "Laplacian Mispricing" and decided to pivot the project towards building a system that combines Graph Theory, Topology, and Causal Neural Networks.
